The **1**[#] Repair Solution for
4" x 4" Wooden Posts

The Post Doctor revitalizes old, wore out, leaning posts that would normally need to be completely replaced along with the average 100 lbs of concrete below. Just level the post, hammer in The Post Doctor, bolt it in place and you're done. With a little topping of mortar (which raises the level of sitting water), The Post Doctor fix should be good for another 10 years of life.

Also, great for rotted mail box posts too!!!

Anatomy of a wooden fence

Wooden post

The Post Doctor

Concrete Base

Before: The Posts are rotted and have weakened to the point of where the fence has now started to lean. No worries, call The Post Doctor.

After: As you see the fence is now straight and has been restored thanks to The Post Doctor.
